

UNITED FOR A JUST FUTURE

IndustriALL Global Union 3rd Congress
14-15 September 2021

Resolution on cooperation with other Global Union Federations (GUFs)

- 1- In the framework of the ITUC founding congress, the council of global trade unions was created that brings together the ITUC , all the GUFs and TUAC, with the aim of creating a space for close cooperation between the various global actors of the trade union movement
- 2- IndustriALL Global Union has actively participated since the foundation of the CGU because it understands the need for joint action between the various GUFs on the key challenges facing workers in the global economy.
- 3- There are opportunities that the recovery and reform of manufacturing and supply chains present for growing union membership and power, reforming international regulation, and establishing new, sustainable standards across the industries and supply chain. Political alignment on supply chain cooperation between global unions and their affiliates is critically important.
- 4- In particular, we are seeing rapid and profound changes in the mode of operation of industry that increasingly results in complex production chains in which different parts of those global supply chains are organized / represented by different GUFs.
- 5- There is a need to leverage our strength to fight for workers' rights across the different levels of these global supply chains, and this can only be done through joint working between the GUFs,
- 6- The 3rd Congress of IndustriALL Global Union therefore resolves:
 - a- Through the CGU, IndustriALL should establish discussion with the other GUFs in order to have an action program on the value chains of the main multinationals.
 - b- A coordination committee should be created, involving the GUFs that join the project, to plan and execute the action plan
 - c- The Action Plan should involve combating violations of union rights throughout the value chain and "organizing campaigns".
 - d- A team should be formed in IGU composed of the directors of the various sectors coordinated by an AGS
 - e- IGU's representative should regularly report the progress of the Action Plan at the executive's meetings.
